

Assistant COMMISSIONER
PATENT OFFICE
Dear Sirs:

GTSA
3/24/04

I have a problem and I need help:

On about June 25 or 26 you received a patent application from me Allen H. Fletchall
entitled:

(on the flo chart) Fletchall Limb and Brench Saw. As of this date ~~10/20/03~~ I have not received anything about it. I think I should have heard something by now. This is beginning to follow a pattern that happened back in 1995 . (explanation) Back then I sent in an application for a new kind of a hose reel . months passed and I did not hear anything from the patent office . I called the patent office and they said they had not receive an application . I talked to Crystal Hammond , she told me to resubmit the application ,which I did. After a few weeks I received word that it had been approved . I sent in the fee and got my patent.But I got cheated out of the first new design hose reel and a chance to sell it. It is my feeling they received the know how from some one in your office.

I am fearing the same pattern is happening now because I have not heard from you office about my application after ~~five~~ months of waiting I have not heard from your office about the status of my application. I need your help in answer to my question .

I am not accusing any one but I am wondering what is going on .

Sincerely

Allen H Fletchall
